## Profile

**Flutter Developer** with experience building high-performance, cross-platform mobile apps for Android and iOS. Skilled in creating clean, scalable code, seamless UI/UX, and integrating APIs for robust functionality. Passionate about delivering innovative, user-focused solutions and staying ahead of industry trends.

## Education

**Bachelor's Degree in Computer Science,** 2017 – 2021
Faculty of Computer and Information Science Mansoura university

## Professional Experience

**Mid-level Flutter Developer,** Link Development Apr 2025 – Present

- Transformed detailed UI/UX designs into highly interactive, visually polished Flutter applications, enhancing user engagement and satisfaction.
- Delivered tailored mobile solutions for diverse business needs, directly contributing to improved client workflows and operational efficiency.
- Facilitated seamless collaboration between developers, testers, and designers, resulting in faster project delivery and reduced revision cycles.
- Optimized and refactored existing codebases, improving performance, maintainability, and scalability across multiple projects.
- Drove process improvements by sharing insights and innovative ideas, fostering a culture of continuous enhancement within the development team.

**Flutter developer,** SADEEMA Mar 2024 – Mar 2025

- Collaborated with UI/UX designers to translate design specifications into interactive and visually appealing Flutter-based applications.
- Actively participated in the development of custom business solutions, tailoring applications to meet unique client requirements and business objectives.
- Engaged with developers and testers in a collaborative environment, fostering effective communication and efficient project delivery.
- Took part in the optimization and refactoring of existing projects, enhancing code structure and efficiency.
- Engaged with teams sharing feedback and brainstorming ideas to improve the development process.

**Flutter developer,** Dubisign Oct 2023 – Feb 2024

- Implemented RESTful web service using Dart and connected mobile applications with different APIs and backend web services.
- Develop and maintain mobile applications using Flutter framework.
- Developed one mobile application, focusing on creating responsive, user-friendly interfaces and optimizing performance.

## Projects

**NBE Platinum**

- Application that simplifies the process of booking any kind of entertainment methods for NBE VIP clients
- Leveraged FCM for push notifications and dynamic links for seamless communication.

- Used RxDart for state management, Get It for dependency injection, and Google Maps APIs.
- **Google Play** , **App Store**

**تأسيس - Taseese**
- Educational application that suits all stages. In each stage there is a group of classes and we have materials for all stages and sub-sections for each subject. There is a set of questions for each section that affects your performance in solving the challenge and improving your educational level.
- Leveraged FCM for push notifications, dynamic links for seamless communication, and social authentication
- Used Bloc for state management, Hive for local and Get It for dependency injection.
- **Google Play** , **App Store**

**MedKing**
- MedKing is a comprehensive medical education app specifically designed to meet your medical education needs. Whether you are a medical student, a practicing physician, or simply interested in learning about medical topics, MedKing provides you with the tools and resources you need to expand your knowledge and improve your skills.
- Leveraged FCM for push notifications and dynamic links for seamless communication.
- Used Bloc for state management, Get It for dependency injection, and Fantatic video Player.
- **Google Play** , **App Store**

**Boubyan concierge**
- Application that simplifies the process of booking any kind of entertainment methods for Boubyan concierge Services
- Leveraged FCM for push notifications and dynamic links for seamless communication.
- Used RxDart for state management, Get It for dependency injection, and Google Maps APIs.
- **Google Play** , **App Store**

**Atmemly**
- Application that works to provide professional free services to users throughout the Arab world. Individuals can work as freelancers through the app and provide their services to clients through the Internet
- Followed clean code principles with Clean architecture pattern.
- Used Bloc(Cubit) for state management and Get It for dependency injection.
- **Google play** , **App Store**

**ضرب وطرح**
- An educational project to teach simple arithmetic operations by taking a small exam to test learning ability.
- Used Provider for state management, Get It for dependency injection, and static data.
- **Google Play** , **App Store**

**كاتب**
- Kateb saves time and is an electronic alternative to paper media in writing and blogging
- Leveraged Firebase Database for store data and Firebase Auth.
- Used Provider for state management, Get It for dependency injection.
- **Google Play** , **App Store**

## Skills

**General**
- Dart
- Java
- C#
- OOP
- SOLID Principles
- Architecture pattern [Clean Architecture - MVVM]
- Problem solving
- Postman
- Git & GitHub
- Application Deployment [App store - Google play]

**Flutter**
- RESTful API [Dio - HTTP]
- State management [Bloc - Provider]
- Firebase [Cloud Firestore - Authentication - Storage]
- Localization
- Payment Integration
- Local database
- Push Notifications
- Google Map
- Deep Linking
- Social authentication[Google,Apple]
